

MEDIA ONE DIGITAL

Detailed Simplified Website Structure
Recommended Brand Positioning

MEDIA ONE DIGITAL

Creative. Digital. Delivered.

Supporting statement:

We build brands, create digital experiences and deliver creative solutions that help businesses stand out and grow.

The website should position Media One Digital as more than a design agency. It should present you as a **creative, branding, digital marketing and technology partner** capable of taking a business from an idea to a complete brand and digital presence.

1. MAIN WEBSITE NAVIGATION

Keep the main navigation simple:

HOME | SERVICES | OUR WORK | PACKAGES | ABOUT | INSIGHTS | CONTACT

On the right:

GET A QUOTE

CLIENT LOGIN

Floating throughout the website:

 **24/7 CHAT**

This avoids overwhelming visitors while still giving them access to everything.

2. HOMEPAGE

The homepage should be the **sales engine** of the website.

It should not contain every detail. Instead, it should quickly answer:

Who are you? → What do you do? → Can I trust you? → What have you done? → How do I start?

HERO SECTION

Large, visually striking creative experience.

WE BUILD BRANDS THAT GET NOTICED.

Creative design, digital marketing and digital solutions for ambitious businesses.

[GET A QUOTE]

[VIEW OUR WORK]

The hero can use subtle animation/video showing branding projects, social media campaigns, websites, printed materials and the team at work.

3. TRUST / CLIENT STRIP

Immediately below the hero:

TRUSTED BY BRANDS THAT THINK BIG

Display selected client logos.

Keep them clean and visually consistent.

[VIEW OUR CLIENTS]

This immediately establishes credibility before the visitor starts exploring the services.
